(a) aerobic assay
substrate S_S (mg COD/L)
dissolved oxygen (mg/L)
time (min)
original ($S_S^0 = 60$ mg/L)
designed ($S_S^0 = 200$ mg/L)
dissolved oxygen (right axis)
original samples
designed samples
(b) predicted and realized uncertainty
relative std (%)
realized (Monte Carlo)
aerobic only
anoxic only
original design
designed
∞
